

VySoft Systems

Practical Training / Internship for Mechanical & Mechatronic Students

Johor

We are recruiting Interns for Practical / Industrial Training for the duration of 3 to 6 months.

Responsibilities:

Trainees will be assigned to carry out mechanical design and development projects.

Requirements:

- Candidates must be pursuing a Diploma or Bachelor Degree in Mechatronic Engineering, Mechanical Engineering or equivalent.
- Duration of training is 3-6 months (depending on the trainees' training requirement).
- Able to work independently as well as in a team.
- Knowledge in G-Code/CNC machine and robotics systems is advantageous, but not absolutely necessary. Training will be provided.

Organization Activities:

VySoft Systems is a research and development (R&D) company providing consultancy, engineering and software solutions for the electronic manufacturing and semiconductor sector.

Please send in your resume/application to hrd@vysoft.com.my (preferred) or mail to:
